**MEMORANDUM FOR SEE DISTRIBUTION**

**SUBJECT:** 3d Corps Support Command (COSCOM) Policy Memorandum #23, Marking of Tactical Tracked and Wheeled Vehicles

1. **PURPOSE.** To establish the 3D COSCOM policy for the marking of tactical tracked and wheeled vehicles.
2. **APPLICABILITY.** Headquarters, 3D COSCOM and all subordinate units.
3. **REFERENCE.** 3D COSCOM Regulation #43-0209
4. **BACKGROUND.** Commencing in early 1999, the COSCOM standard for vehicle and equipment markings has been attained using a stencil and vinyl letters applied in the appropriate location. Since that time, units have discovered that the vinyl letters do not remain permanently affixed and that after hard wear and tear must be replaced on a regular basis.
5. **POLICY.** Vehicles, trailers, generators, ISU's and other systems that require marking may be marked in the following fashions:
  - a. Stencils may be cut using the machine purchased to stencil the vinyl letters.
  - b. Stencils may be applied to the appropriate location and black lusterless spray paint may be used to outline the marking. Soldiers will ensure that all marking is accomplished without overspray and presents a neat professional appearance.
  - c. If commanders so desire, they may retain the stencil cutting machine and the vinyl letters as long as all bumper markings appear uniform and professional in appearance.
6. **SUPERSESSION.** This policy supersedes all previous memorandum and COSCOM regulations pertaining to this subject.
7. **EXPIRATION.** This policy memorandum remains in effect until rescinded.
